PROFESSIONAL SUMMARY

Data product and analytics professional with 10+ years of cross-functional experience, including 8+ years at Oracle across partner analytics, revenue operations, and commercial processes. I translate commercial and operational needs into product requirements, data logic, reporting, and internal tools that improve visibility and support decisions. I bring hands-on SQL and BI delivery, product prioritization, and cross-functional leadership across business, Finance, and Engineering.

SKILLS

Product Strategy and Lifecycle: Product Roadmaps, PRDs and Functional Specs, User Discovery, Backlog Prioritization, User Acceptance Testing (UAT), Jira, Cross-Functional Alignment, KPI Definition

Data and Analytics: Advanced SQL, Data Modeling and Reconciliation, Snowflake, dbt, Oracle Analytics Cloud (OAC), Power BI, Tableau, Oracle APEX

AI and Developer Tooling: Cursor, Claude Code, AI-Assisted Programming, LLM Evaluation Loops, Agentic Workflows, Prompt Engineering, OCI Generative AI

Revenue Operations and GTM: Quote-to-Cash (Q2C), Configure, Price, Quote (CPQ), Pipeline and Bookings Governance, Cloud Consumption Analytics

PROFESSIONAL EXPERIENCE

Senior Data Product Manager, Partner Analytics — Oracle Corporation, Bengaluru, India Mar 2024–Present

- Owned multiple partner analytics and operational data workstreams—including Business & Technical Assessment, PCMS reporting, and partner incentive analytics—setting requirements, sprint roadmaps, and delivery priorities with Engineering, Finance, and global RevOps stakeholders.
- Built a leadership dashboard tracking assessment and Proof of Performance progress across 220+ submitted opportunities.
- Defined qualified-booking logic using assessment and Proof of Performance approvals and opportunity status, supporting tracking of USD 1.5M+ in qualified bookings across 86+ partners.
- Rebuilt partner-program data flows, corrected funnel logic, and added reason-coded data-quality flags to clarify reported issues and qualified pipeline.
- Defined specifications translating credit policies into Oracle APEX system logic for 300+ partners and 1.2B consumed credits, partnering with the lead developer on backlog and delivery decisions.
- Prioritized balance tracking, approval workflows, and transaction logs over lower-priority features; led sprint grooming and UAT with Finance and Sales Operations.
- Built an APEX reporting module and SQL queries used by 30+ stakeholders across Finance, Sales Operations, and the Strategic Partner Group.
- Designed traceable incentive eligibility logic across agreement histories and partner hierarchies, replacing manual reviews and establishing baseline data for cloud-consumption analysis.

Insights Analyst II, Partner Insights & Revenue Operations — Oracle Corporation, Bengaluru, India Mar 2023–Mar 2024

- Built and maintained partner analytics dashboards serving 60+ users and recording 50,000+ queries per quarter across deal registration, pipeline, bookings, and operations.
- Defined deal-registration metrics with stakeholders and data engineers, validated an initial mock-up, and delivered the production dashboard.
- Produced CPQ and RevOps reporting for leadership reviews, identifying transaction-volume declines and coordinating fixes to underlying process issues.
- Re-engineered recurring Dev/Test reporting for Global Systems Integrator partners with AI-assisted tooling, reducing production time from two weeks to 2–3 days.
- Forecasted transaction workload ahead of a partner-program transition to inform staffing and service-level coverage.
- Delivered cloud-consumption and bookings analysis for the Strategic Partner Group and Finance.

Business Operations Team Lead — Oracle Corporation, Bengaluru, India **Feb 2022–Mar 2023**

- Led a 20-member EMEA revenue-operations team handling 20,000+ tickets per quarter, managing workload allocation, quality checks, service-level monitoring, and leadership reviews.
- Closed 8 of 11 complex CSP Aggregate Buying deals outside the standard CPQ path on Q4's final day by coordinating Sales, Legal, Deal Management, and approvers; documented the process as a team SOP.
- Established queue monitoring and ticket ownership with the territory team's director for approved opportunities awaiting sales-rep assignment.
- Trained team members on cloud and hardware procedures and onboarded new hires to support consistent transaction handling.
- Handled complex sales queries and interviewed candidates for contract and entry-level roles.

Business Operations Specialist — Oracle Corporation, Bengaluru, India **Jul 2021–Feb 2022**

- Advised Sales as Cloud SME on deal structures, pricing, quote configuration, contract requirements, and approval paths for cloud transactions.
- Resolved non-standard transactions with Legal and Deal Management, clarifying exception requirements and downstream booking handoffs.
- Authored standard procedures and pricing-escalation guidance for recurring transaction exceptions.
- Trained teammates on cloud transaction requirements and exception handling.

Business Operations Analyst — Oracle Corporation, Bengaluru, India **May 2018–Jul 2021**

- Processed EMEA partner deal registrations and prepared CPQ quotes, checking partner eligibility, pricing, and commercial documentation.
- Coordinated deal approvals and contract reviews with Legal and Sales, tracking transactions through the quote-to-order process.

Senior Associate, HR Shared Services — Amazon Development Center India, Bengaluru, India **Sep 2016–Dec 2017**

- Managed employee lifecycle workflows and served as Kaizen/Gemba process-improvement lead to streamline shared-services operations.

Technical Support Representative — IBM India, India **May 2015–Sep 2016**

- Delivered Level 1 enterprise technical support for banking systems, Siebel, VMware, and Active Directory; earned the team's top customer-satisfaction rating.

Lead Demonstration Specialist / Store In-Charge — Bose Corporation, India **May 2013–Mar 2014**

- Managed store profitability, inventory controls, and margin reporting while coaching floor staff to meet retail sales targets.

Food & Beverage Associate — Four Seasons Hotel, Mumbai, Mumbai, India **Oct 2009–Sep 2011**

- Coordinated daily floor operations and shift handoffs while upholding luxury-brand service standards in a high-volume hospitality environment.

PROJECTS

- Sales Outreach Agent — LLM-assisted drafting with rule-based tone checks and follow-up sequencing.
- Product Discovery AI — Multi-agent competitor research, customer-pain synthesis, and market sizing with a quality-audit step.
- Digital Twin — Serverless AI persona on my portfolio site that answers questions about my background, qualifies leads, and sends real-time notifications.
- Work Intelligence Assistant — Classifies approved Slack, Outlook, and Jira requests into trackable next actions.

Personal projects. Product direction and design by Terry, with AI-assisted implementation. Demos and code: terrymathew.com.
